

TRIPOD+AI checklist

Device and site shortcuts dominate smartphone throat-image classification of bacterial pharyngitis: a multimodal benchmark on PGUPharyngitis

Checklist version of 11 January 2024 (Collins et al., BMJ 2024;385:e078378). Page numbers refer to the submitted PDF.

Item	Topic	Where reported	Page
1	Title	Title page	1
2	Abstract	Abstract (structured)	3
3a	Background	1 Introduction	4
3b	Intended use	1 Introduction	4
3c	Health inequalities	1 Introduction; 4.8	4
4	Objectives	1 Introduction (contributions)	5
5a	Data source	3.1 Dataset	7
5b	Dates	3.1 Dataset	7
6a	Setting, centres	3.1 Dataset	4
6b	Eligibility	3.1 Dataset	7
6c	Treatments	3.1 Dataset	7
7	Data preparation	3.3 Preprocessing; 3.1	7
8a	Outcome	3.2 Labels	7
8b	Outcome assessors	3.2 Labels	7
8c	Blinding of outcome	3.2 Labels	7
9a	Choice of predictors	3.3 Preprocessing; 3.5 Models	8
9b	Predictor definitions	3.1 Dataset; 3.3	7
9c	Predictor assessors	3.1 Dataset (symptoms recorded at collection; details not reported in source)	7
10	Sample size	3.1 Dataset	7
11	Missing data	3.3 Preprocessing	8
12a	Use of data, partitioning	3.4 Evaluation protocol	8
12b	Predictor handling	3.3 Preprocessing	8
12c	Model type, tuning, internal validation	3.4; 3.5 Models	8
12d	Heterogeneity across clusters (sites)	3.6 Shortcut analyses	10
12e	Performance measures	3.7 Statistics	10
12f	Model updating	Not applicable (no external evaluation or recalibration)	–
12g	How predictions were calculated	Code availability	21
13	Class imbalance	3.5 Models; 4.7	8
14	Fairness	3.7 Statistics; 4.8	10
15	Model output, thresholds	3.4 Evaluation protocol	8
16	Training vs evaluation differences	3.4 (same population; cross-validation); 3.6 cross-phone transfer	10
17	Ethical approval	Ethics statement	7
18a	Funding	Funding	20
18b	Conflicts of interest	Declaration of competing interest	20
18c	Protocol	Protocol, registration and patient involvement	20
18d	Registration	Protocol, registration and patient involvement	20
18e	Data sharing	Data availability	20
18f	Code sharing	Code availability	21
19	Patient and public involvement	Protocol, registration and patient involvement	20
20a	Participant flow	4.1 Cohort; Fig. 1; Table 1	11
20b	Participant characteristics	4.1 Cohort; Table 1	11
20c	Development vs evaluation distributions	Not applicable (cross-validation on one dataset); per-phone characteristics in Table 1	–
21	Participants and events per analysis	3.2 Labels; 3.4; Tables 1, 4	8
22	Full model specification	3.5 Models; Eq. (1); Code availability	9

Item	Topic	Where reported	Page
23a	Performance with CIs, subgroups	4.2; Table 2; Fig. A.7	12
23b	Heterogeneity across clusters	4.3 Device and site shortcuts; Table 3	12
24	Model updating results	Not applicable	–
25	Interpretation	5 Discussion	17
26	Limitations	5.1 Limitations	19
27a	Poor-quality input data	5 Discussion (Implications)	19
27b	User interaction and expertise	5 Discussion (Implications)	19
27c	Next steps	5 Discussion (Implications); 6 Conclusion	19
